TWENTY-SECOND ANNUAL REPORT

DEPARTMENT OF PUBLIC SAFETY

December 1, 1941 - November 30, 1942.

THE COMMONWEALTH OF MASSACHUSETTS  
TWENTY-SECOND ANNUAL REPORT

---

DEPARTMENT OF PUBLIC SAFETY  
1010 COMMONWEALTH AVENUE, BOSTON.

---

To the Honorable Senate and House of Representatives:

I have the honor of submitting the twenty-second annual report of the Department of Public Safety for the fiscal year from December 1, 1941 to November 30, 1942.

The following is a summary of the activities of the Divisions of State Police, Inspection, Fire Prevention, Boxing Commission, and various boards and bureaus of the department for the fiscal year.

DIVISION OF STATE POLICE  
TRAFFIC CONTROL

During the past year, enforcement activities decreased 52.8% over the previous year. This is to be expected since the limited amount of gasoline allowed for pleasure driving during the heavy traffic season practically eliminated all non-essential driving on the highways in the rural sections, which are principally patrolled by the State Police.

This reduction in traffic also had its telling effect on the number of accidents occurring on these highways. A comparison of accident statistics for 1942 with those of the previous year reveals a 45.3% decrease in motor vehicle accidents, 49.8% less persons injured, and 33% less fatalities. Pedestrian accidents showed a reduction of 54.2%, with 64.6% less persons injured and 32% less fatalities. Bicyclists involved in accidents with motor vehicles showed a slight change of two in number. Last year eighteen bicyclists were involved, eight of whom were adults and were injured; the others were children, one of these being killed. This year out of a total of sixteen bicyclists involved, four were adults and twelve children, all of whom were injured.

A complete analysis and summary of all State Police investigated accidents along with a comparison summary of all motor vehicle law enforcement activities may be found in the following pages of this report.

## HIGHWAY SAFETY

The traffic accident problem on state highways was greatly alleviated in the past year by the decreased volume of traffic, due to tire conservation, mileage rationing, and the shortage of motor fuel. Traffic on state highways outside of residential areas, decreased as much as 53.9% during one month in the usually heavy traffic season, and for the year there was an overall decrease in traffic volume of 36.1% over 1941. With such a decrease in the traffic flow on state highways, there was a natural decrease in traffic violations and accidents in rural areas, which resulted in a decrease of 52.8% in recorded violations, and a 45.3% decrease in the number of accidents investigated by State Police Officers.

In addition to the decrease in traffic volume, an emergency law limiting speeds of vehicles to 40 miles an hour, became operative in March of 1942, and this law was amended in September to further limit speeds to 35 miles an hour. In the past, excessive speed has been directly responsible for approximately 35% of all accidents investigated by the State Police. With the reduced flow of traffic and slower speeds, there was not only a decrease in traffic accidents but also a decided decrease in the number of persons killed or injured on state highways.

With the limitations which were placed on pleasure-driving, travel in general has not been for long distances, and the traffic law enforcement problems became essentially local in

character. Motor vehicle driving has been limited chiefly to those persons engaged in essential activity, and this travelling usually has been to and from their homes to the nearest centers of population. This change in traffic movements required that patrol schedules be arranged to meet these wartime traffic problems, so that officers would be on the highways for short periods during various times of the day to handle sudden increases in traffic caused by changing of shifts in war plants. This type of accident prevention and traffic law enforcement is consistent with our past program based on "Selective Enforcement", and is considered most essential during the war emergency period, so as to prevent persons who are part of the war effort from breaking the laws of the road and thus endangering themselves, others, and the war effort.

During the year, we have had to adapt our traffic law enforcement program to meet the special needs of the military and war production agencies, as well as to meet enforcement needs of blackouts, dimouts, and other war hazards. In this connection, we have had to assign officers to patrols on main arteries, despite traffic being almost negligible, so as to be immediately available to provide escorts for explosive or military convoys moving on emergency orders. The necessity for escorts for explosive convoys is apparent and, of the many hundreds of such convoys during the year, not one collision involving an escorted vehicle was reported.

Although some difficulty was experienced in maintaining traffic law enforcement at an efficient level, due to an acute manpower shortage during the latter part of the year, and on account of the many added duties our limited personnel had to perform, occasioned by the war emergency, the records indicate that an intelligent and rigid enforcement of the traffic laws was maintained insofar as available personnel would permit.

## BUREAU OF COMMUNICATIONS

The teletype setup at General Headquarters in Boston consists of six machines on what is known as the State Police private line teletypewriter system, one machine on the suburban circuit embracing 32 cities and towns, one machine on the TWX (Teletypewriter Exchange) system, that permits the sending of messages anywhere in the country. The six machines under the State Police system have control of all inter-troop messages by the use of three turret switching arrangements in multiple with each other and controlled by an extensive relay system which is maintained 24 hours a day. This office also has direct circuits to State Police at Concord, New Hampshire, State Police at Providence, Rhode Island, the Registry of Motor Vehicles, the Massachusetts Board of Probation, the State Police at Hartford, Connecticut and by relay at Northampton to the State Police at Albany, New York. Through this teletype network maintained throughout the Commonwealth, with send and receive machines at all our State Police Barracks, upward of 300,000 messages were transmitted during the year, for the distribution of confidential police information both within the Commonwealth and to other states connected on the police teletypewriter system.

Since the outbreak of the war, the Bureau of Communications at Boston has been utilized for the transmission of

messages by a number of Federal and State agencies, including the United States Army, United States Navy, United States Coast Guard, the O.P.A., F.B.I., the Adjutant General's office and the Massachusetts Committee on Public Safety, for the immediate dissemination of messages pertaining to the war effort.

The use of the TWX system and the regular State Police teletype system has been utilized by the Investigations Section of the Provost Marshal's office with headquarters in Brookline, Massachusetts, in connection with action taken on the disposition of deserters and soldiers A.W.O.L. from their organizations, who have been apprehended by police departments located in the First Corps Area.

Through the State Police Teletype System, immediate information is transmitted to the proper State and Federal authorities when verification and information is requested by the Boston Army Information Center in regard to airplane accidents and reported acts of enemy sabotage in this Commonwealth and in bordering states.

The State Police and suburban circuits were used extensively for progress reports in the movement of large Army convoys and the interstate transportation of explosives. By so doing, all police departments through whose area these convoys pass, are notified beforehand of the convoys' progress and are therefore prepared to expedite the movement.

The 26th Infantry Division with headquarters at Wilmington, Delaware, through the use of the TWX machine has regularly trans-

mitted messages for Camp Framingham to this office and they were then relayed via our State Police Teletype System.

As well as serving the general public and the news service agencies on current road conditions, the Massachusetts Committee on Public Safety, the Adjutant General's office, the New England Sector (Coastal Defense), the 1st Service Command, the 1st Naval District and the United States Weather Bureau are notified at least once a day of such conditions from a summary report obtained from all State Police Barracks in the Commonwealth.

The Office of Naval Intelligence of the 1st Naval District, through our direct line with the Massachusetts Board of Probation, daily submits names of subjects whom they are checking for criminal records. The United States Coast Guard has also submitted a large number of names for the procurement of criminal records.

• Through the State Police Teletype System and the Suburban circuit, the O.P.A. released announcements of the curtailment on the sale of automobiles, tires, tubes and gasoline, and arrangements were made via the teletype system at this office for the delivery of rationing forms to city and town officials.

During the extensive War Game Maneuvers conducted by the United States Army and the State Guard, the Teletype Bureau was maintained as a central clearing point for all

messages received by our Troop Headquarters from radio cruisers on duty with the Army and State Guard officers. These messages were transmitted directly to the Adjutant General's office by means of the teletype machine that has been installed in the State House for use in collaboration with the State Police Teletype System.

A private line telephone has been installed in the Teletype Bureau connected with the Massachusetts Committee on Public Safety, Region 5, Warning Center (Office of Civilian Defense), so that in the event of an actual air raid they may contact this Bureau without experiencing difficulty. Daily checkups are maintained over this line each day to insure proper operation.

Two private line telephones have also been installed at the Bureau, one connected with the Federal Communications Commission Inspectors assigned to the Army Information Center, the other connected with the Air Defense Wing of the First Fighter Command. The connection with the Federal Communications Commission Inspectors is used when a radio shutdown is ordered by the Army authorities in the event of an impending aid raid. The connection with the Air Defense Wing of the First Fighter Command is maintained as a secondary unit to provide another communications link to the Command in the event Region Warning Centers cannot be reached through normal channels.

The teletype system at our General Headquarters has become one of the most important cogs in the communications

system for Civilian Defense for the Commonwealth of Massachusetts, as this report indicates.

The flexibility of this system has proved to be of the utmost importance during the National Emergency in the dissemination of emergency messages up to the present time and it is expected that more extensive use of this system will be made in the future.

The records kept in the files at the Teletype Bureau at General Headquarters show during the past fiscal year that -

9,299 automobiles were reported as stolen and of this number 9,053 were reported recovered. In 167 cases, this Bureau assisted in the recovery of these cars by means of identification through our files.

During the last year, 6020 crimes were reported at this office, coded and filed in the Crime and Property files. Of these crimes, 3035 cases have since been closed and cancelled, and these files have been directly responsible for the solving of 56 of these cases.

During the same period, 8235 persons were reported missing. Of this number, 6706 were located. In 73 cases this Bureau assisted in the identification of these persons.

3407 persons were reported as wanted for the commission of a crime. Of this number, 2387 were apprehended. In 52 cases, this Bureau assisted by means of identification.

## RADIO SYSTEM

For the past few years, the State Police radio system has been used not only as a communications system for this Department, but also as a means of radio communication for approximately 75 towns having receivers on our main station frequency at their stations or in cruiser cars.

At the request of the Federal Communications Commission in Boston, this Department assumed the responsibility for the duties of a control station and a relay control station. Under the Civilian Defense setup, the control and relay control stations are for the notification of municipal and state police departments throughout New England in the event that an air raid warning is sent out, so that other police departments using radio would be warned to remain off the air until the all clear signal is given. With a telephone connection with the Federal Communications Commission at the Army Information Center, we are directly advised and through the medium of our teletype system we are able to send a message to all our relay control stations, thereby giving the signal out as requested by the Army in a minimum of time. Alert test messages are frequently ordered, to test the line and to guard against the possibility of a radio station remaining on the air in the event of an actual raid.

The equipment used in this service has been in use for a number of years and includes some transmitters that are nearly obsolete. The added use made of this apparatus

in the past year, occasioned by the war effort, has seriously diminished its effectiveness because of the inability to procure replacement parts to make necessary adjustments when breakdowns occur.

As a result of a survey conducted by the Department of Industrial Relations of the Massachusetts Institute of Technology, with a view towards improving the radio system of the Massachusetts State Police, certain recommendations were made and specifications submitted for a complete three-way radio-telephone communications system for the Massachusetts State Police.

Installation of this new equipment is being made at the present time, and eventually this State will have seven 250 watt main station transmitters, two 25 watt main station transmitters and 103 cruisers equipped with transmitters and receivers. This will greatly improve our radio system and will provide two-way communication from car to station from any point in this Commonwealth to at least one main station.

When this installation is complete, increased service will be provided to the public and no time will be lost as in the past in finding telephones and establishing connections with stations by officers having only a one-way radio connection. An accident at night will no longer require driving to the nearest telephone and then waiting for the necessary connections. Ambulances, medical aid and additional help can be summoned from the first State Police car on the scene.

This system will also place a communication station right at the scene of any crime or disaster, expediting reports to Headquarters within ten seconds after a cruiser arrives at the scene.

This system will use what is commonly known as Frequency Modulation or F. M., and has a number of advantages over our present Amplitude Modulation System. It provides a minimum of interference between station signals, in that the stronger signal over-rides the weaker signal so that it will be possible for more than one station to be on the air at any one time and very little interference, if any, will be caused.

With the location of the seven main stations so arranged, control for each transmitter is located in the Troop Headquarters station of each Troop. By this method, each Headquarters station will have complete control of all cruisers within their respective areas and can give orders direct to the personnel assigned to these cruisers while on patrol or investigation duty. It is anticipated that this F.M. equipment will be completely installed by May 1, 1943.

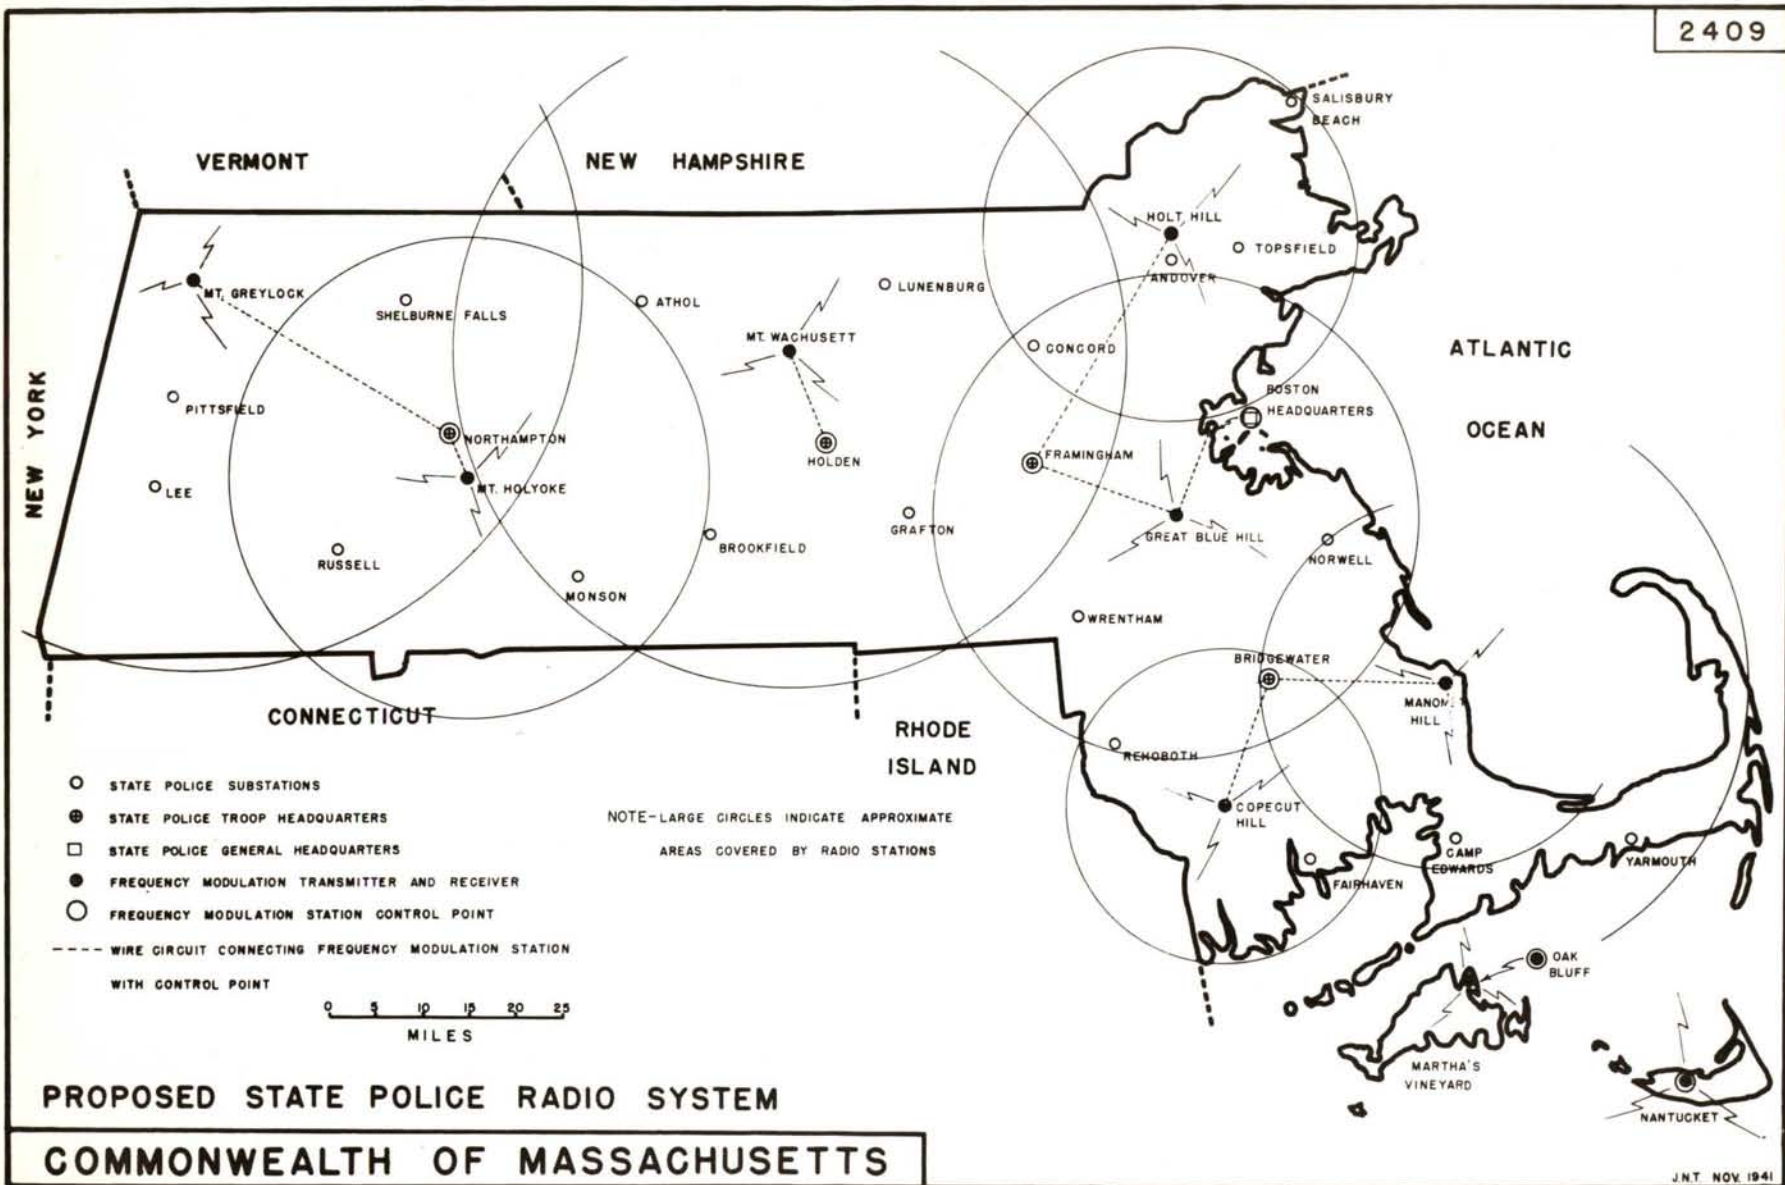

To secure replacements for a large number of uniformed officers, who left the service to join the armed forces, it was deemed necessary to replace some of these men with civilian personnel. Accordingly, over a period of about 8 months, 21 civilians were employed as Communications Dispatchers. These employees were provided with a course of training which consisted of a two weeks' course of intensive teletypewriter training at the school conducted by the New England Telephone & Telegraph Company. The training also consisted of the tech-

nique of radio broadcasting, the geography and location of State Police stations, and association of the nine-state teletypewriter system.

At the conclusion of this course of instruction, these men were assigned to the various stations under the supervision of a uniformed officer for a two week period. These men are now employed as Communications Dispatchers, conducting the duties of the uniformed men whom they have replaced.

SUMMARY OF ASSISTANCE RENDERED

Arrests - 52

These arrests were for the following offenses:

Larceny by False Pretenses, Larceny, Larceny of Narcotics, Larceny by Check, Escapes (Penal Institutions, State Hospitals, Violation of Parole, Desertion of U. S. Army), Leaving the Scene (Property damage) Armed Robbery, Larceny of Motor Vehicles, Assault, Forgery, and breaking, entering and larceny.

Locating Persons - 77

These locations were of the following classes:

Missing Persons, Persons Located in Emergency Cases, and the identification of bodies of unidentified persons.

Recovered Property - \$96,525.00

The above is the value of all lost and stolen property that has been recovered through the assistance rendered by this Bureau.

# NUMBER OF ARRESTS AND CRIMES ARRESTED FOR

5 - Larceny	1 - Leaving the Scene
3 - Armed Robbery	2 - Larceny of Narcotics
1 - Breaking, Entering and Larceny	1 - Larceny by False Pretenses
1 - Larceny by Check	6 - Larceny of Motor Vehicles
30 - Escapes (State Hospitals)	1 - Forgery
(Penal Institutions)	1 - Assault (Stabbing)
(Violation of Parole)	
(Desertion - U. S. Army)	

Total Arrests . . . . . 52

## LOCATING OF MISSING PERSONS

73 - Missing Persons located through the files at this Bureau

## UNIDENTIFIED PERSONS

1 - Body of unidentified person, identified through files at this Bureau

## ASSISTANCE RENDERED IN EMERGENCY CASES

3 - Persons located in emergency cases by this Bureau

## STOLEN PROPERTY RECOVERED

Automobiles. . . . .	167 . . . . .	\$96,350.00
Registration Plates. . .	12	
Revolvers . . . . .	2 . . . . .	<u>80.00</u>
Total . . . . .		\$96,430.00

## LOST PROPERTY RECOVERED

Pigeons . . . . .	\$20.00
Tire . . . . .	<u>75.00</u>
Total	\$95.00

Total amount of property recovered . . . . . \$96,525.00

### SUPPLY DIVISION

The Supply Division is in charge of a State Police Sergeant. The purchasing, handling and distribution of State Police supplies has been economical and efficient. The functions of this division include accounting, purchasing, transportation and care and maintenance of buildings. The Division has been able to return to the general fund of the Commonwealth a substantial sum from the amount of money originally allotted to it for expenditures.

Following is the Statistical report of the activities of the  
Division of State Police for the year 1942:

Cities and Towns . . . . .	52
Federal Departments . . . . .	4
Out-of-State . . . . .	2
United States Army and United States Navy . . . . .	33

The number of cases submitted to the Chemical Laboratory for the fiscal year 1942 was 271. There has been a noticeable increase in the number of cases connected with alleged sabotage submitted by agencies of the armed forces of the United States in the New England area.

## MEDICO-LEGAL CONSULTANT

During 1942 the pathologist and his staff assisted the various medical examiners of the Commonwealth in the conduct of 100 official medico-legal postmortem investigations. These examinations were performed in accordance with Chapter 38, section 7 of the General Laws and were concerned with determining the cause and circumstances of obscure or violent deaths.

Table I shows the kinds of cases in which the assistance of the pathologist of the Department was requested by medical examiners.

TABLE I

### Kinds of Cases Investigated

HOMICIDE		20
Abortion . . . . .	1	
Assault with blunt instrument . . . . .	5	
Neglect (Infanticide) . . . . .	2	
Stabbing and cutting . . . . .	4	
Strangulation . . . . .	1	
Shooting . . . . .	7	
SUICIDE		6
Hanging . . . . .	1	
Poisoning . . . . .	3	
Shooting . . . . .	2	
ACCIDENTS		27
Automobile . . . . .	4	
Asphyxia . . . . .	3	
Drowning . . . . .	3	
Falls . . . . .	8	
Poisoning . . . . .	7	
Shooting . . . . .	2	
OBSURE DEATHS FROM NATURAL CAUSES . . . . .		42
CAUSE OF DEATH NOT DISCLOSED BY AUTOPSY . . . . .		<u>5</u>
Total . . . . .		100

Table II shows the geographic distribution of cases in the investigation of which the services of the Pathologist were requested.

TABLE II  
Distribution of Cases according to  
Counties and Medical Examiners

<u>County</u>	<u>No. Cases</u>	<u>Medical Examiners</u>
Barnstable	3	Drs. Curry, Cass
Berkshire	1	Dr. Wickham
Bristol	19	Drs. Rosen, Battershall, Boylan
Essex	5	Drs. Mansfield, Deacy, Stone, Cusick, Snow
Franklin	1	Dr. Mahar
Hampden	15	Drs. Bigelow, Chapin, Fletcher
Middlesex	23	Drs. Guthrie, Perley, Greene, Miles, McLean, Alling, Dow
Nantucket	1	Dr. Folger
Norfolk	10	Drs. Dalton, Shenker, Richardson, Higgins, Schofield
Plymouth	13	Drs. Lough, Hines, Budreski, Smith, Leavitt, Vinal
Worcester	5	Drs. Clarke, Mahoney, Reynolds

In most of the cases the postmortem investigations were aided by other experts in the Department, notably in chemistry, firearms identification, and photography. In all deaths by violence and in a large majority of those due to accidental or

obscure causes, specimens removed at autopsy were examined for alcohol (70 cases). In all instances in which postmortem examination disclosed that death may have been due to the criminal act of another person, photographs of the bodies were made (24 cases). In all deaths known or suspected to have resulted from poisoning, toxicological analyses of parts of the body were made (17 cases). In most cases of assault in which external bleeding had occurred, postmortem samples were taken for the performance of blood grouping tests (12 cases). In all cases of fatal injury by shooting, tissues and clothing were tested for powder residues and bullets, if available, and were submitted to the firearms expert (11 cases).

## DIVISION OF INSPECTION

The Division of Inspection is in charge of a director designated as the Chief of Inspections. Under the supervision of the Commissioner, the Chief of Inspections administers the provisions of Chapters 136, 143 and 146 of the General Laws.

The authorized personnel of the Division of Inspection consists of twenty-one building inspectors, one of whom is assigned as Supervisor of Plans, and twenty-six boiler inspectors, one of whom is assigned for duty in connection with the approval of plans for the construction and maintenance of tanks under the provisions of Chapter 148 of the General Laws, Sections 37 and 38, and another serves as Chairman of the Board of Boiler Rules.

At the present time four building inspectors and one boiler inspector are serving with the armed forces.

The provisions of Chapter 143 of the General Laws, which are enforced by the building inspectors, apply to the examination and approval of plans for the construction of public buildings; the erection, alteration, inspection and use of certain buildings; the inspection and approval of elevators in cities and towns having no building inspection department; and the enforcement of the laws, rules and regulations governing the use of the cinematograph and similar apparatus for the exhibition of motion pictures. Building

inspectors also conduct examinations of applicants for licenses as motion picture operators, and have supervision of all motion picture projection booths throughout the Commonwealth, and the inspection of safety film for use in special exhibitions.

The provisions of Chapter 136 of the General Laws relative to the observance of the Lord's Day are also enforced by the building inspectors.

Many conferences are held during the course of the year with local officials, construction engineers and architects regarding the erection, use and alteration of public buildings, theatres, school houses and places of public assemblage, from all of whom splendid cooperation is received. The heating, ventilation, egress and sanitation of such buildings is under constant supervision.

The work of the Supervisor of Plans includes the approval of all plans for the erection or alteration of public buildings, industrial plants, hotels, lodging houses, apartment houses, etc., for the purpose of securing uniformity in construction work throughout the Commonwealth.

The provisions of Chapter 146 of the General Laws, which are enforced by the boiler inspectors, apply to the inspection of certain steam boilers and their appurtenances, both internally and externally, and to ascertain the general condition of the boiler and its appliances while the boiler is under steam; also to see if they have the proper appendages for safety as prescribed by the Board of Boiler Rules. Air tanks carrying a pressure ex-

ceeding fifty pounds per square inch and their appurtenances are also inspected to see that they conform to the rules formulated by the Board of Boiler Rules. The engineers' and firemen's license law is also enforced by the boiler inspectors and is a valuable contribution to public safety. Much of the time of the inspectors is given to the examination of applicants for licenses as engineers and firemen as well as for certificates of competency as inspectors of steam boilers in the employ of authorized boiler insurance companies.

#### BOARD OF BOILER RULES

The Board of Boiler Rules is appointed by the Commissioner of Public Safety under the authority of Chapter 22 of the General Laws, Section 10. The Board consists of a boiler inspector of the department, who acts as chairman, and four associate members representing the operating engineers, boiler using, boiler manufacturing, and boiler insurance interests.

The Board is required by law to formulate rules for the construction, installation and inspection of steam boilers and air tanks carrying a pressure in excess of fifty pounds per square inch, and for ascertaining the safe working pressure to be carried therein; to prescribe tests to ascertain the qualities of materials used in the construction of boilers and air tanks, and to formulate rules regarding the construction of safety valves, the use of fusible safety plugs, pressure indicators, and other safety appliances.

The law provides for public hearings in May and November, and at such other times as may be deemed necessary by the Board, on

petitions for changes in the rules formulated by it. The board also receives and examines for approval specifications for boilers of special design not covered by the rules.

On June 9, 1942, Inspector George A. Luck, Chairman of the Board of Boiler Rules for the past seven years, retired after thirty-five years of service in the department, and on June 10, 1942 Inspector John A. Murdock was appointed to succeed him.

Because of the increasing difficulty in securing materials needed for the construction of boilers, air tanks and their appurtenances, due to the need of these materials for the carrying on of the War effort, the Board initiated changes in the boiler and air tank rules and regulations to make them more flexible for the duration. On July 16th and on September 9th the Governor's Council approved these changes, the last approval including the authorization of the Board to suspend, relax or modify the application or operation of the rules during the continuance of the existing state of war between the United States and certain foreign countries. This resulted in an increased number of petitions for waivers of certain parts of both high and low pressure rules.

During the year, fifteen meetings of the Board have been held, including the two semi-annual public hearings required by the statutes on the first Thursday in May and November, respectively, and two advertised hearings held on June 19th and July 23rd. Of the total of forty-three petitions heard by the Board, thirty-eight were granted and five rejected.

Following is a list of the meetings of the Board and the

number of petitions approved or rejected:-

<u>Date of meeting</u>	<u>Petitions approved</u>	<u>Petitions rejected</u>
December 12, 1941	0	1
January 2, 1942	0	1

\*\* Advertised hearing

The following manufacturers were authorized to manufacture Massachusetts Standard boilers:

C. H. Dutton Company . . . . .	Kalamazoo, Michigan
New York Central Railroad . . . . .	West Albany, New York
Lummus Company . . . . .	New York, N. Y.

The following manufacturers were authorized to manufacture Massachusetts Standard Air Tanks:

Eastern Steel Tank Corporation . . . . .	Brooklyn, N. Y.
J. D. Cousins & Sons Boiler Works, Inc. . . . .	Buffalo, New York
Hamler Boiler & Tank Company . . . . .	Chicago, Illinois
New York Central Railroad . . . . .	West Albany, New York
W. W. Sly Manufacturing Company . . . . .	Cleveland, Ohio

During the year ending November 30, 1942, there was submitted for the approval of the Commissioner of Public Safety a total of 51,824 licenses and programs of entertainments to be held on the Lord's Day.

Of the total number of 51,824 licenses and programs of entertainments which were submitted, 51,820 were approved and 4 disapproved, shown as follows:-

Agawam . . . . .	1
New Bedford . . . . .	1
Northampton . . . . .	1
Shrewsbury . . . . .	1

Each of these licenses and programs was accompanied by a fee of \$2.00, the amount totalling \$103,643, which was paid to the Treasurer of the Commonwealth. This amount was \$26,402 in excess of the year 1941.

The following tabulation of figures will show the number of licenses and fees collected for same during the fiscal year of 1942 as compared with previous years:-

<u>Year</u>	<u>Number of Licenses</u>	<u>Amounts Collected</u>
1933 . . . . .	20,963 . . . . .	\$ 41,926
1934 . . . . .	21,803 . . . . .	43,616
1935 . . . . .	23,291 . . . . .	46,582
1936 . . . . .	24,911 . . . . .	49,822
1937 . . . . .	27,035 . . . . .	54,170
1938 . . . . .	28,894 . . . . .	57,783
1939 . . . . .	31,074 . . . . .	62,143
1940 . . . . .	33,527 . . . . .	67,054
1941 . . . . .	38,623 . . . . .	77,246
1942 . . . . .	51,824 . . . . .	103,643

During the past year there were 6,215 reels of motion picture film censored for showing on the Lord's Day, which were disposed of as follows:-

Number of reels approved . . . . .	6,215
Number of reels approved with deletions . . . . .	63
Number of reels disapproved . . . . .	7
Footage of film censored . . . . .	4,916,000

## DIVISION OF FIRE PREVENTION

The Division of Fire Prevention is under the charge of a Director who is known as the Fire Marshal. Under the supervision of the Commissioner, the Fire Marshal administers and enforces the provisions of Chapter 148 of the General Laws.

The Division was successful in the apprehension and conviction of persons involved in arson and fraudulent burnings.

Arrests for 1942 pertaining to arson and burning to defraud total 45 arrests with a total of 76 counts:

Convictions . . . . .	62
Not Guilty . . . . .	7
Cases pending . . . . .	7

Cases from previous years disposed of:

3 arrests - total of 8 counts; convictions 8.

There were other arrests, total 31, with a total of 55 counts, convictions obtained in all counts. These included illegal storage and transportation of inflammable fluids and explosives, and setting fires in the open.

During the year the Division has strictly supervised and enforced the laws and regulations governing explosives. One officer of the Division of State Police is assigned to the Division to assist in the work.

On the entry of this country into the present war, explosives were stored in 185 magazines. On December 15,

1941 all magazines containing explosives were ordered placed under constant guard for the duration of the war. During the year 140 magazines were discontinued due to this order, and there are now 45 magazines used for the storage of explosives maintained under guard; 285 inspections were made of these magazines which contained at the time of inspection 1,820,447 pounds of high explosives and 926,871 detonators. 1920 pounds of high explosives and 1200 detonators were found to be in unsafe condition for storage or use, and were ordered removed and destroyed.

There were four violations of the explosive regulations prosecuted, and 310 pounds of explosives ordered forfeited. There were six deaths caused by the explosion of explosives - five in connection with the manufacture and one in connection with the use of explosives.

Ninety-one permits were granted for the transportation of explosives, and 131 inspections were made of vehicles used for the transportation of explosives. Thirty-nine pounds of explosives were turned over to this Division by local police and fire departments for destruction.

# SUMMARY OF DIVISIONAL ACTIVITIES.

Fires investigated . . . . .	1369
Fire inquests held . . . . .	26
Blasting investigations . . . . .	3

## BOXING COMMISSION

The Boxing Commission consists of the Commissioner of Public Safety as Chairman and two Commissioners appointed by His Excellency the Governor. The duties of the Commission include the supervision of all boxing exhibitions held in the Commonwealth and the regulation of boxing generally.

The following is a statistical report for the period ending November 30, 1942:

The number of professional clubs conducting boxing matches and exhibitions was 11 and the number of exhibitions held was 187.

Receipts from license fees (all sources) . . . . .	\$ 7,719.00
Five per cent of gross receipts from boxing exhibitions . . . . .	19,424.00
Clubs licensed . . . . .	11
Exhibitions authorized . . . . .	187
Exhibitions disapproved . . . . .	0
Exhibitions cancelled . . . . .	0
Exhibitions held . . . . .	187

### Licenses granted:-

Boxers (Complete) . . . . .	83
Boxers (Part payment) . . . . .	382
Managers . . . . .	41
Seconds (complete) . . . . .	86
Seconds (part payments) . . . . .	89
Referees . . . . .	17
Judges . . . . .	22
Timekeepers . . . . .	10
Physicians . . . . .	22

### Licenses revoked:-

Boxers . . . . .	3
Managers . . . . .	0
Seconds . . . . .	0
Clubs . . . . .	0

### Licenses suspended:-

Boxers . . . . .	30
Managers . . . . .	2
Seconds . . . . .	2
Clubs . . . . .	1

Visiting boxers debarred from State . . . . .	143
Visiting managers debarred from State . . . . .	12
Visiting seconds debarred from State . . . . .	12
Special and amateur exhibitions authorized . . . . .	62
Special and amateur exhibitions disapproved . . . . .	0
Special and amateur exhibitions cancelled . . . . .	3
Special and amateur exhibitions held . . . . .	59

## BUREAU OF STORAGE OF LIQUIDS

The storage of petroleum products and all other liquids other than water in aboveground tanks or containers of over 10,000 gallons capacity is carried out under specifications for construction and maintenance prescribed by statute law and regulations. The greater part of this storage is maintained at the large bulk stations of the major oil companies, particularly at railheads and waterfront plants. The following is a comparative statement of the number of such tanks or containers in use during the years 1941 and 1942:

	<u>1941</u>	<u>1942</u>
Number of tanks in use . . . . .	3,323	3,357
Number of cities and towns where tanks are located . . . . .	207	207
Number of corporations maintaining tanks . . . . .	383	386
Permits for new construction . . . . .	61	34
Permits for relocations . . . . .	7	1

A total of 35 tanks were covered by permits of the Commissioner for the year 1942 to contain a total of 1,095,512 gallons, mainly for the storage of petroleum products.

Such tank applications have, so far, included the storage of gasoline, fuel oil, liquefied gas, such as propane having a pressure of 200 pounds per square inch, and butane with a pressure of 100 pounds per square inch, tar, molasses, water glass, alcohol, latex, liquid rubber, vinegar, etc., tanks containing chemicals carrying a pressure, so far, from 200 pounds per square inch to atmospheric pressure, and illuminating gas tanks carrying pressure, so far, up to 50 pounds per square inch.

The specifications of such tanks, including their supports, foundations, protecting dikes, safety equipment, etc., are submitted to this department for approval by the Commissioner before issuing a permit to erect these tanks.

The Inspector in charge of this bureau also checks the installation of the new tanks in the field, and periodically checks the upkeep of all storage plants. He also checks and passes on the specifications of all new boilers and tanks installed in this State.

The number of Massachusetts Standard Boilers and Air Tanks checked and approved during 1942 is as follows:-

Massachusetts Standard Boilers	-	449
Massachusetts Heat Boilers	-	104
Massachusetts Standard Air Tanks	-	6147

There has been a noticeable reduction in the number of applications for permits during the year, due to the scarcity of steel and shortage of oil shipments, due to the war.

### SALE AND CARRYING OF FIREARMS

The sale and carrying of firearms within the commonwealth is regulated by General Laws, Chapter 140, sections 121 to 131 C inclusive. In accordance with the provisions of these statutes, the department receives and files records of sales of firearms, permits to purchase, licenses to carry, revocation of licenses and records of sales of rifles and shotguns. Information concerning the operation of the statutes received from licensing authorities throughout the commonwealth established the following records for the fiscal year:

	<u>1941</u>	<u>1942</u>
Licenses issued to dealers . . . . .	65	57
Sales of pistols and revolvers reported by dealers . . . . .	1,547	2,624
Sales of rifles and shotguns reported by dealers . . . . .	17,532	10,970
Licenses to carry revoked . . . . .	47	227
Licenses to carry pistols or revolvers issued . .	19,772	27,376

The following is a list of cities and towns in which licenses to carry pistols or revolvers were issued and the number of persons so authorized:

### PRIVATE DETECTIVE AGENCIES

Licenses to conduct business as a private detective agency are issued by the Commissioner of Public Safety under Sections 22 to 30, inclusive, of Chapter 147 of the General Laws.

There are at present twenty-nine such licensed persons or agencies licensed to do business in Massachusetts. The total revenue to the State from this source in 1942 was \$3800.

### FORFEITED LIQUORS

The provisions of Chapter 133 of the General Laws which relate to the disposition of liquors ordered forfeited by the courts of the Commonwealth, stipulate that such liquors shall be forwarded to the Commissioner of Public Safety to be disposed of according to law. Similar provisions of law are applicable to implements of gaming seized in raiding operations under the authority of search warrants.

The following statistical data indicates the disposition of liquors and gaming implements forfeited during the fiscal year by the courts:

	<u>gallons</u>
Spirits received during fiscal year . . . . .	58 3/16
Spirits on hand December 1, 1942 . . . . .	-
	<u>58 3/16</u>
Spirits destroyed on warrants . . . . .	33 2/16
Spirits delivered to State Institutions . . . . .	25 1/16
Spirits on hand December 1, 1942 . . . . .	-
	<u>58 3/16</u>
Wine received during fiscal year . . . . .	265
Wine on hand December 1, 1942 . . . . .	-
	<u>265</u>
Wine destroyed on warrants . . . . .	258 6/16
Wine delivered to State Institutions . . . . .	6 10/16
Wine on hand December 1, 1942 . . . . .	-
	<u>265</u>
Malt received during fiscal year . . . . .	227 11/16
Malt on hand December 1, 1942 . . . . .	-
	<u>227 11/16</u>
Malt destroyed on warrants . . . . .	88 15/16
Malt delivered to State Institutions . . . . .	138 12/16
Malt on hand December 1, 1942 . . . . .	-
	<u>227 11/16</u>

Cities and Towns visited collecting Contraband . .	29
State Institutions receiving free alcohol through requisition . . . . .	1
Money taken in raids and from gaming machines and delivered to the State Treasurer, as directed by forfeiture warrants . . . . .	\$1070.46
Received from the sale of containers and metals and paid over to the State Treasurer . . . . .	13.00
Turned over to the Clerk of District Courts as directed by forfeiture warrants, money in the amount of . . . . .	317.54
Turned over to the State Treasurer unclaimed money in the amount of . . . . .	27.60
Gaming machines destroyed during the fiscal year . . . . .	29
Cities and Towns visited collecting machines and forfeited money . . . . .	37
Destroyed as directed by forfeiture warrants, a number of time clocks, betting slips, playing cards, tables, chairs, blackboards, radios, loud speakers, intercommunication sets, fans, race charts, punch boards, etc.

RULES AND REGULATIONS MADE BY THE  
DEPARTMENT OF PUBLIC SAFETY

- Form AA - Ammonia Compressor Safety Valve Rules.
- Form B-1 - Inspection of Buildings subject to Chapter 143, General Laws.
- Form B-2 - Construction of Buildings subject to Chapter 143, General Laws.
- Form C - Use of Cinematograph and Other Apparatus for Exhibition of Motion Pictures.
- Form E - Low Pressure Heating Boilers.
- Form F - Keeping, Use, etc., of Fuel Oil.
- Form G - Transportation of Inflammable Fluids over the Highways.
- Form H - Elevator and Escalator Regulations.
- Form I - Construction, Use and Maintenance of Tanks.
- Form J - Air Tanks.
- Form O - Transportation of Gasoline and Fuel Oil on Waters of the Commonwealth.
- Form P - Boxing.
- Form Q - Storage, Use, etc., of Fireworks.
- Form S - Keeping, Storage, etc., of Inflammable Fluids and Compounds.
- Form U - Board of Boiler Rules.
- Form W - Garages.
- Form X - Fire Hazards.
- Form Y - Explosives.
- Form Z - Dry cleaning and Dry Dyeing.  
Standardization of Fire Hose and Hydrant Couplings and Outlets for Public Fire Protection.

### CONCLUSION

In concluding this report, I wish to express my appreciation of the loyal cooperation and valuable services rendered by the entire personnel of the Department who have made possible a year of substantial accomplishments, and to extend to all other departments in the State service my sincere thanks for their cooperation and assistance.

Eugene M. McSweeney

By

John F. Stokes  
Acting Commissioner.
